## Zaleski Model #6 Snow-Guard (Aluminum)

**MATERIAL:** Our model No.-6 Snow-Guard is manufactured using .020 thickness of Aluminum 5052-H32. Since it is double thick the result is  $.020 \times 2 = .040$ . Purposed for light duty. Use the model #8 Stainless Steel for heavier snow loads.

**TYPE OF ROOF:** Slate, Asphalt, Wood-Shingle, Tile

**FASTENING:** An integral engagement feature of the Snow-Guard hooks over the head edge of slate or tile without nailing. Snow-Guards on asphalt and wood shingles require nailing.
